Money cannot buy a better and more practical course of business training than is offered this year at NORWICH BUSINESS COLLEGE. We value the confidence of an intelligent public too much to advertise that we have several \$25 per week positions which we cannot fill, when the average small school boy knows there are hundreds of capable bookkeepers and stenographers now receiving from \$12 to \$15 per week, who would be glad to fill them.

We want you to come to the NORWICH BUSINESS COLLEGE because you believe it to be the best, and because you desire to prepare for a responsible position in the least possible time, and save months of tuition.

Enroll today, and let us prove our claim.

NORWICH BUSINESS

COLLEGE B. M. HINMAN, Principal

SERV-US MINCE MEAT

Package condensed mince meat is made up today of the best quality of dried fruit and other items which can We are offering the early part of this month quite a reduction on our Mixed Paints in order to stimulate business during dried fruit and other items which can be found, all of which are found in the United States with the exception of spices and currants. The study of packing condensed mince meat has extended over a period of 190 years and today is as near its perfection as we can possibly conceive. The sanitation in the factories in which it is packed is beyond reproach as the competition today in these lines necessitates the guarding of the most minute detail of uarding of the most minute detail of the dull part of the season. It is not exactly a dollar day, but you can make the dollar buy sidered in procurring the very highest grade of spices, and sugar, as we all know, is always sugar, the different grades merely representing the different flavors or different grapulation required for different purposes. Every particle of fruit or any other article used in the manufacture of mince meat is thoroughly cleaned and hand-picked by people trained to know what should and should not be used and in this is thoroughly cleaned and hand-picked by people trained to know what should and should not be used and in this manner the article comes to the house-wife cleaner by far than she could possibly take the same articles in her own kitchen, regardless of how clean it may be, and make up the filler for her mince pie. The old idea of dirt being prevalent in quantity is today disputed by the greatest authorities on food products. The meat used in mince meat is of the choicest and to-day the same corn-neer which you and I would use on our table is what is being used in Serv-us Mince Meat. There are very few pies made which can be used as handily by the house-wife as mince meat for all it requires is a little water and being heated for ten minutes and it is ready for the crust and then the table and she may without fear of loss carry three or four packages of mince meat in her pantry, having it ready at any time for the chance occurrence of unexpected company and it will be a good dessert free from dirt. It is our thorough belief that a mince meat pie made from condensed mince meat is about as cheap a dessert as can be prepared and yet as good.

For many years mince meat was considered a winter dish. Each year for the last ten our factory has had to increase its capacity during the summer months until today it runs every day of the year with a regular force of helpers. We ship goods to every part of the country the entire year. This of course means a great increase in the use of these goods over when mince meat was eaten only in the winter months which means an ingage your paint stock now at
